VERSION WITH MARKINGS TO SHOW CHANGES MADECLAIMS:

31. (Amended) An optical disk comprising:
- a data zone having pits indicating data signals readable by light radiation;
  - a reflective layer formed on the data zone; and
  - portions of the reflective layer being trimmed forming markings, wherein the markings form a barcode pattern indicating information and are formed on the pits [on a track of] functioning as a track on the optical disk.
32. (Amended) A method of manufacturing an optical disk comprising the steps of:
- forming, on a substrate, a data zone having pits indicating data signals readable by light radiation;
  - forming a reflective layer on the data zone; and
  - trimming the reflective layer to form markings on the pits [on a track of] functioning as a track on the optical disk;
  - wherein the markings form a barcode pattern indicating information.
